EDUCATION

Bachelor Of Computer Science,
Specialization in AI

University of Alberta, Canada
Third Year, 3.7 GPA

Honours Roll

Expected Graduation - 2027
(interest in MSc with AI Research)

PROFILE

Dedicated student learning under the prestigious University of Alberta AI program. Knowledgeable in the current industry and well-versed in many industry standard tools. Looking to leverage my knowledge and fully commit to a full-fledged research position or on-field job opportunities.

Relevant Courses: Artificial Intelligence, Machine Learning, Software development & practices, Computer Architect, Discrete Math, Linear Algebra & Calculus, Probability & Statistics, Academic Writing for Research

KEY SKILLS

C/C++/Python/JavaScript/React/
Julia/JupyterHub/Git/Bash/SQL/
MongoDB/Assembly

Microsoft's, Google's, and
LibreOffice's Tools & Ecosystem.

Various Collaborative and Project
Management Software.
(Norton/Git/Slack/Joplin/Etc)

Fast Learner – Can quickly learn
any topic/software/language on
the job.

Flexible – Able to adapt my
workflow to suit any environment.

Creative– Very invested in the
newest innovations and
technologies. Up to the challenge
of proper academic research!

Planning – Well organized and
well planned. On top of my
schedule, allowing for my great
multitasking ability

PERSONAL PROJECTS

Self-Hosted AI Models

- Configured and ran various LLM models such as Dolphin-Mistral, Gemma, Llama 3, GPT(4all). Experimented with training my own models
- Self-hosted stable-diffusion for image generation. Experimented & learned with various techniques for fine tuning my results: parameters, prompt engineering, LoRas, HyperNetworks, canvas repainting, etc
- Managed these instances using open-source software like Ollama and Hugging Face. Attended and networked at major AI conferences

Web Development

- Self taught web development using online resources. Proficient with raw HTML/CSS/JavaScript, and the React Framework with Typescript & Vite
- Rewrote a pure CSS template website using ChakraUI and my own skills. Added more functionally and UI adjustments. (See Vercel link above)
- Used API's to incorporate online data in a fully functional game search website. Filters by tags and search by keywords (see Github link above)

Linux

- Active user of Arch/Manjaro Linux and the surrounding ecosystem. Fluent with the console and loves to modify software to my liking
- Fine tuned development environment to reduce headaches and increase productivity. Bash scripting to automate tasks and streamline my work
- Fully optimized virtual machines with GPU passthrough to run Window's software and games

[RYAN YAN_ C.S. Student & AI Enthusiast]

ADDITIONAL SKILLS

Fluent in English and Mandarin

Dedicated and Hardworking

Problem solving

Team leadership

Flexible Schedule

Open to Work Remote/In-Person

Access to a Class 5 License and a
Car

School Projects

- Collaborated on a mock library program that stored and modified user data via an SQLite database. CLI interface with numerous options.
- Implemented my own floating point format in C based on IEEE 754. Recreated all basic math operations, made memory safe, and compatible with normal numbers.
- Meticulously recreated the game snake in RISC-V assembly – need I say more? Over 1000 lines of code to write, debug, document, and maintain.

3D-Printing Business

- Manages a small 3D printing business for item printing on demand
- Online automation using custom firmware, a Raspberry Pi, and my printers connected and controlled through the internet.
- Strong finance management and communication with customers

PREVIOUS EMPLOYMENT

Restocker - PepsiCo

June 2023 – September 2023

- Coordinated & scheduled deliveries, organizing back storage, and restocked the store's shelves
- Kept track of inventory and reordered new stock as needed. Help reduce the workload of my fellow employees
- Maintained an early schedule of 7am, always arriving on time.

Food Worker – Those Little Donuts

June 2022 – August 2022 (K-Days)

- Operated the machinery while simultaneously supervising multiple coworkers. Assisted management whenever I could
- Remained professional and calm while handling huge quantities of customers. Worked under high stress and harsh conditions
- Helped train new employees on the job, receiving additional bonuses
